This project is a:	**Renewal-no changes proposed**
Grant Term	**1 year**
Project Type	**Transitional Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	Project is a Transitional Housing project for the homeless youth population. It operates 5 apartment units in DuPage County to assist homeless young men ages 18-24 who have no stable family or resources to achieve permanent housing. The point in time capacity is 10 homeless individuals. The project uses the Housing First model by providing low-barrier transitional housing that does not have service participation requirements or preconditions to entry (such as sobriety, criminal record, domestic violence or a minimum income threshold). The project prioritizes rapid placement and stabilization in housing. Individualized program services are offered to help participants obtain employment/ job training, increase their income, obtain medical coverage, learn budgeting and life skills, and obtain GED/post high school education. A new position of Job Coach/GED tutor has helped employment in the program rise to 90% of residents. All participants are assisted to enroll in appropriate mainstream resources and health care. Participation in these services is voluntary based on the needs and willingness of the program participants. Services are client centered and tailored to the unique needs of each individual. They have access to all services that they believe will help them achieve their goals. What we do is actively engage the program participant, meet them where they are at, encourage positive behaviors, but in no way require service participation or set time limits as conditions for housing. Participants are not terminated for failure to participate in support services, loss of income or failure to increase income, failure to make progress on a service plan or being a victim of domestic violence. There is a stable existing relationship with a landlord that facilitates efficient and timely renting of units in a stable location. The target population is young men who are runaways living on the street or in shelters because they have no family home in which they can reside. Due to the age, immaturity and lack of life skills of these residents, The project offers on site case management services daily. The project works with other homeless shelter providers to meet a specialized need in homeless services which is not duplicated by any of these other service providers. Each apartment provides safe and secure housing to 2 program participants. Permanent affordable housing and economic self-sufficiency is the goal.
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes.	None of the above
Project Capacity	5 : Total Units in Project 10 : Total Beds in Project 0 : # of designated chronic beds in this project 0 : # of designated chronic beds in this project currently filled with persons with a chronic homelessness status NA : If no designated chronic beds, type NA 314 : Average Length of Stay: Leavers from APR (Q_27) 196 : Average Length of Stay: Stayers from APR (Q_27)
Consolidated Questions	100% of renewals reported all participants met eligibility. 100% of applicants reported no HUD monitoring (no result) and 100% reported yes to the project Affirmatively futhering Fair Housing

This project is a:	**New project-Agency has received CoC funding within the last three years.**
Grant Term	**1 year**
Project Type	**Supportive Services Only**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	A coordinated assessment process is intended to increase and streamline access to housing and services for those experiencing homelessness; prioritizing them for appropriate levels of housing and services available within a community based on severity of needs. A coordinated entry system should ensure ongoing engagement occurs to households unable to self-resolve their homelessness and who remain on the list. Lastly, coordinated entry provides information about service needs and gaps to help communities efficiently allocate funds and identify needed resources. Following a housing first model coordinated entry connects households experiencing homelessness to housing without pre-conditions and barriers to entry. The DuPage Continuum of Care created a coordinated entry system in August, 2015. The initial implementation began with prioritizing households for placement in permanent supportive housing. Since inception a total of 647 clients have been assessed utilizing the VI-SPDAT (Vulnerability Index-Service Prioritization and Decision Tool). According to data pulled from the HMIS database as of January 13, 2017 there were 421 individuals actively on the prioritization list. Approximately 24% of the clients on this list are not actively engaged in a program or with a social service provider to work towards housing readiness. Due to the lack of engagement 101 individuals or 46% have been returned to the prioritization list because an agency is unable to contact or locate them. Over the next year, the Coordinated Entry Engagement and Eligibility Support will work to meet HUD's system level performance measure of reducing the length of time persons remain homeless. Activities will include providing linkages to case management support, assistance in obtaining documentation to meet program eligibility requirements and landlord engagement to assist households placed on the centralized prioritization list become housing ready. Goals: A minimum of five households per quarter will be engaged and assessed to determine housing readiness; ensuring eligibility requirements are met and mainstream benefits are in place. To exit a minimum of five households off the list each quarter, support and linkage will be provided between agencies and clients preparing for PSH, TH and RRH as these openings become available. Based on need, landlord engagement will be provided to initiate housing placement for households exiting the Coordinated Entry and Prioritization List.
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes.	None of the above
Project Capacity	0 : Total Units in Project 0 : Total Beds in Project 0 : # of designated chronic beds in this project 0 : # of designated chronic beds in this project currently filled with persons with a chronic homelessness status NA : If no designated chronic beds, type NA 0 : Average Length of Stay: Leavers from APR (Q_27) 0 : Average Length of Stay: Stayers from APR (Q_27)
Consolidated Questions	100% of renewals reported all participants met eligibility. 100% of applicants reported no HUD monitoring (no result) and 100% reported yes to the project Affirmatively futhering Fair Housing

Project Type	**Transitional Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project provides 11 homeless families with stable housing and the support services needed to maximize their self-sufficiency. The housing provided bythe project are scattered site units throughout DuPage County and ensures that these families will have better access to other basic need services that are critical for breaking the cycle of homelessness. The project serves low-income families with children in DuPage County whose lack of housing, inadequate income, and limited life skills leave them vulnerable and homeless for extended periods. Unique to this program are two service models for Transitional Housing in DuPage. Each model addresses varying strengths and needs of the individuals served the project to provide assistance to families in the model that best meets their individual needs. The first model offers case management and volunteer mentoring support; and the second model offers primarily case management support. The two models include essential service linkage but provide greater flexibility, funding sources and resources for meeting a variety of needs that exist with the population served. The agency does not exclude individuals that have criminal backgrounds, lack a valid driver's license, a car, have significant amounts of debt, poor credit history, or a poor/inconsistent work history. Accomplishments: Over the past project year, the project had a total of 100% (3/3 families) who exited to permanent housing. These families had at least one source of cash and non cash benefits. These goals were achieved through intensive case management in the areas of budgeting, employment and life skills training. The agency has focused on increasing participants' knowledge in the areas of savings, reducing debt and managing their credit. This is reflected in the Total Income Measure: a total of 36% of the adults enrolled in the project increased their overall income. 100% of stayers had at least one type of cash and non cash benefit. Goals: Over this next program year, in regards to housing stability, the project will continue to meet the target of having 80% of persons exit to permanent housing. In addition, the project will meet the target of 50% of persons 18 or older increase their total income at the end of the operating year or program exit.
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes.	Most recent APR shows utilization rate below 90% (Q_10 & Q_11) Most recent APR shows fewer than 50% of participants (leavers and stayers) meeting employment income OR total income measures (Q36_2a)
Project Capacity	11 : Total Units in Project 36 : Total Beds in Project : # of designated chronic beds in this project : # of designated chronic beds in this project currently filled with persons with a chronic homelessness status NA : If no designated chronic beds, type NA 585 : Average Length of Stay: Leavers from APR (Q_27) 313 : Average Length of Stay: Stayers from APR (Q_27)

This project is a:	**Renewal-no changes proposed**
Grant Term	**1 year**
Project Type	**Permanent Supportive Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project provides 5 chronically homeless families with stable housing and the support services needed to maximize their self-sufficiency. This housing is provided through scattered site units within DuPage County. Securing stable housing for this population continues to be a challenge in our community. The housing provided by the project is essential and ensures that these families will have better access to other basic need services that are critical for breaking the cycle of homelessness. The requirement that these families meet HUD's definition of chronically homeless is another factor that makes the project a critical and a unique part of the DuPage Homeless Continuum. The project uses leasing funds for safe, affordable housing for homeless families with complex social problems such as chronic substance abuse, severe mental illness, physical disabilities, developmental disabilities and domestic violence issues that tend to affect their quality of life. Practicing a housing first service model and applying principles of harm reduction,the agency provides housing to families without any preconditions. Families also receive intensive support services such as case management, independent living skills training, linkage to mainstream benefits, access to one-on-one employment support and other training such as parenting education, financial literacy, and classes that help maximize housing stability and prevent returns to homelessness. Accomplishments: The project had a total of 100% or 21/21 of the participants maintain their housing. Participants were able to achieve this through intensive case management and working on good housekeeping skills so they can live within the community. In addition, the project had 100% or 6/6 adults in the program who maintained or increased their total income, which exceeded the target of 63% and 100% of stayers had at least one source of cash and non-cash benefits. Goals: Over this next program year, in regards to housing stability, the project will continue to meet the target of having 80% of persons remain in the permanent housing program at of the end of the operating year or exit to permanent housing during the operating year. In addition, the project will continue to meet the target of 50% of persons age 18 and older maintain or increase their income at the end of the operating year or exit.
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes.	None of the above

Project Type	**Permanent Supportive Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project is a unique collaboration of two agencies. Within this permanent supportive housing project, one agency combines extensive case management services and a stable residential setting so that 14 single individuals who have been chronically homeless and exhibit a complexity of needs who require a permanent supportive housing setting for an indefinite period of time can become as independent as possible. The other agency provides 13 families with disabilities safe, stabilized housing for an indefinite period of time that allows for linkage and direct access to supportive services as needed for them to become as independent as possible and improve their quality of life. The housing is provided through scattered site units within DuPage County. This project ensures that these families and individuals will have better access to other basic need services that are critical for breaking the cycle of homelessness. Accomplishments: During the past project year, the project had 100% of 7 leavers exit the program to permanent housing. The project exceeded the Housing Stability Measure target (88%) by 12%. In addition, 100% of the 7 leavers exited with at least one type of cash and non-cash benefit. The project exceeded the Total Income Measure target (56%) by 34% and had a total of 90% of participants who either maintained or increased their income over the project year. Out of the total 51 stayers, 49 or 96% have at least one type of cash income and all 51 stayers or 100% have at least one type of non-cash income. Additionally, during the program year, one adult child was able to exit to her own apartment with no financial assistance and two households moved in with family as a permanent placement. Goals: Over this next program year, in regards to housing stability, the project will continue to meet the target of having 80% of persons remain in the permanent housing program at of the end of the operating year or exit to permanent housing. In addition, the project will continue to meet the target of 50% of persons age 18 and older maintain or increase their total income from all sources as of the end of the operating year or program exit.
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes. Project Type	**Permanent Supportive Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project is a permanent supportive housing project providing 22 homeless families with stable housing and the full array of comprehensive support services needed to maximize their functioning. The housing provided by the project is scattered site units throughout DuPage County. The housing is safe, essential and ensures that these families will have better access to other basic need services that are critical for breaking the cycle of homelessness. The project is a unique collaboration involving three DuPage County organizations; Metropolitan Family Services, the YWCA of Metropolitan Chicago, and Catholic Charities. Project families benefit from a residential services team approach to address their behavioral health, counseling, and case management needs as they work to reduce barriers and complex issues that place them at risk of homelessness again. The goal of the project is to help these families be able to live independently with support despite the multiple complex barriers that have seriously limited their ability to achieve self-sufficiency prior to project participation. Accomplishments: The project had a total of 99% of persons who exited to permanent housing or maintained their housing over the project year. Out of the 6 households who exited the project, 5 households obtained permanent housing and unfortunately, one head of household passed away. The project exceeded the Housing Stability target by 13%. This was accomplished by providing intensive case management and working on landlord relations and housekeeping skills to maintain housing. Over 60% of households maintained or increased their income. In addition, all leavers had at least one source of cash and non cash benefits. Of those participants who remained in the project, a total of 29/30 (97%) have at least one type of cash and non cash benefit. Case managers are SOAR trained and also assist families with transportation to mainstream resources and with checking documents for non-cash income sources. Goals: Over this next program year, in regards to housing stability, the project will continue to meet the target of having 80% of persons remain in the permanent housing program at of the end of the operating year or exit to permanent housing during the operating year. In addition, the project will continue to meet the target of 50% of persons age 18 and older maintain or increase their total income from all sources as of the end of the operating year or program exit.

Project Type	**Permanent Supportive Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	This is a 30 bed project that is served through multiple locations across DuPage County, Illinois. It is tenant based rental assistance operated by a unit of local government. There are existing relationships with landlords that facilitates efficient and timely renting of units. The project has 21 one bedroom units serving individuals and 3 two bedroom units serving families with children. It serves homeless individuals with a primary diagnosis of mental illness, though many have a coexisting diagnosis of substance abuse. This project prioritizes efficient entry into housing and does not have preconditions for entry such as income, sobriety, criminal background, participation in services, etc. Persons are not screened out of housing due to poor credit, lack of employment, lack of income or active addictions. There are no barriers to entry such as poor credit, criminal background, and lack of income or addictions. The project offers comprehensive support services both directly and through linkages. Participation in these services is voluntary based on the needs and willingness of the program participants. Services are client centered and tailored to the unique needs of each family or individual. They have access to all services that they believe will help them achieve their goals such as such as management of medical and psychiatric issues, substance abuse issues, wellness, and activities of daily living, community integration, economic self-sufficiency and self-development. No one is required to participate in services. Clients served in this program have access to the integrated care program offered at the DuPage County Health Department which integrates primary and behavioral healthcare as well as offering wellness programming and access to dental resources. Participation in these services is voluntary based on the needs and willingness of the program participants. Services are client centered and tailored to the unique needs of each family or individual. Staff use techniques such as harm reduction and motivational interviewing to mitigate the harms of drug addiction and assist persons in acquiring and utilizing new skills and information.
Performance Measure Thresholds: 1. This project prioritizes efficient entry into housing and does not have preconditions for entry such as income, sobriety, criminal background, participation in services, etc. Persons are not screened out of housing due to poor credit, lack of employment, lack of income or active addictions. There are no barriers to entry such as poor credit, criminal background, and lack of income or addictions. There are 49 persons in this program. The individuals served by this program are offered a comprehensive treatment package including behavioral health services, wellness services and access to physical health and dental resources as well. Clients are also offered to participate in an integrated care model where all aspects of health are assessed and treated with a team approach. This is an innovative treatment for holistic care of individuals with behavioral healthcare needs who benefit from assistance in managing all aspects of their healthcare needs. The project offers comprehensive support services both directly and through linkages. Participation in these services is voluntary based on the needs and willingness of the program participants. Services are client centered and tailored to the unique needs of each family or individual. They have access to all services that they believe will help them achieve their goals such as management of medical and psychiatric issues, substance abuse issues, wellness, and activities of daily living, community integration, economic self-sufficiency and self-development. Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project operates in 5 scattered site apartment units that are leased by the DuPage County Health Department. There are existing relationships with landlords that facilitate efficient and timely renting of units. There are no barriers to entry such as poor credit, criminal background, lack of income or addictions. The units are two-bedroom, allowing each resident to have his/her own bedroom. Residents in this program are offered skills training in the areas of psychiatric treatment, substance abuse, managing physical health needs, activities of daily living, community integration, economic self-sufficiency and self-development. Participation in these services is voluntary based on the needs and willingness of the program participants and no one is required to participate. Services are client centered and tailored to the unique needs of each individual. Clients have access to all services that they believe will help them achieve their goals such as managing their mental illness and other health concerns, economic self-sufficiency, self-development, etc. All clients in this program are offered service through the DuPage County Health Department MYCARE program which is an integrated care approach that integrates all aspects of care for the individual with severe mental illness. This approach integrates behavioral healthcare, primary physical healthcare, wellness services, and adjunct treatment such as substance abuse services, dental care in order to maximize health outcomes for our residents.
Performance Measure Thresholds: 1. Grant Term	**1 year**
Project Type	**Permanent Supportive Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project is a permanent supportive housing project for chronically homeless persons with a disability. In 2016 it was combined with a similar project as both projects had like objectives. 100% of the beds in the project are designated for chronically homeless persons and are located in 46 scattered site units: 4 designated for veterans; 4 designated for families; and 38 for individuals. The projecte uses housing first and harm reduction approaches and offers intensive case management to tenants, including twenty-four-hour crisis assistance. The project works with those that are often not sober, not medication compliant, and those that have been turned away or discharged from other social service agencies. The goals of the project are to assist chronically homeless persons to obtain and remain in housing; to improve self-sufficiency with the ability to live independently in an apartment in regards to housekeeping, cooking, grocery shopping, and personal hygiene; to obtain eligible mainstream benefits and/or obtain earned income; and to learn how to structure their day and develop pro-social activities. Residents are not required to have income or pay rent unless financially able. This allows the project to serve those that are the hardest to engage and comply with both financial and treatment requirements. Case management support services enables participants to successfully remain in their permanent setting and provide linkages with appropriate mainstream resources that builds up the income support base they need. In addition,the agency offers comprehensive employment services at their Career Solution Center. This includes individual assessments, employment readiness services, job seeking and job retention strategies, and a computer lab for job searches. The project partners with WorkNet DuPage to provide vocational training for manufacturing, CDL, CNA, and computer technology as well as Sedexo for internship programs in food service. Participant's skills and interests are assessed to find a career path and then linked to local employers and/or vocational training. During 2016, participants were able to attend new programs offered by the agency. Sessions on Chronic Disease Management were offered for participants to better maintain a healthy lifestyle and resulted in measurably fewer hospital visits. Another program called Harmony, Hope, & Healing increased social interaction while providing guidance on stress management.
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes.	None of the above
Project Capacity	46 : Total Units in Project 54 : Total Beds in Project 54 : # of designated chronic beds in this project 54 : # of designated chronic beds in this project currently filled with persons with a chronic homelessness status : If no designated chronic beds, type NA 1372 : Average Length of Stay: Leavers from APR (Q_27) 1418 : Average Length of Stay: Stayers from APR (Q_27)
Consolidated Questions	100% of renewals reported all participants met eligibility. 100% of applicants reported no HUD monitoring (no result) and 100% reported yes to the project Affirmatively futhering Fair Housing

This project is a:	**New project-Agency has received CoC funding within the last three years.**
Grant Term	**1 year**
Project Type	**Supportive Services Only**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	This supportive services only project would establish a position for a Coordinated Entry Outreach Specialist who would provide direct linkage between the providers and the homeless population in DuPage County. This position would assist in moving people through the system faster and reduce the amount of time people spend moving from program to program before finding a right match. On any given night there are 150 to 200 homeless people in emergency shelters in DuPage County and 405 people are currently on the coordinated entry list. As the largest shelter provider in the County, the agency is often the first point of entry for families and individuals who are homeless. As a part of this agency, the Coordinated Entry Outreach Specialist would have a direct opportunity for engagement with 75% or more of the people that are on the coordinated entry list. This position will establish direct partnerships with other housing program providers in DuPage County to ensure that those who are screened will be prioritized. The Coordinated Entry Outreach Specialist would work closely with the agency's street outreach team to build relationships with people not already on the coordinated entry list and therefore ensure that the hardest to serve population are entered onto the list. The position would also collaborate with the HMIS staff to ensure data quality standards for the coordinated entry list is accurate and follow up with the agency who enter the data. This supportive service role would ensure that people who are screened for the coordinated entry have the appropriate documentation of time homeless and disability in order to facilitate a smooth transition into the housing placement. This position would align with the Department of Housing and Urban Development (HUD) primary goals for the coordinated entry processes.
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes.	None of the above

This project is a:	**New project-Agency has received CoC funding within the last three years.**
Grant Term	**1 year**
Project Type	**Rapid Re-housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project will provide rapid re-housing to a minimum of 10 homeless households (individuals and families) over one-year period. Data through the coordinated entry system identifies 43% of the persons on the coordinated entry list are identified as needing rapid re-housing in DuPage County. The project will establish consistent policy and procedures to determine and prioritize eligible individuals and/or families to receive assistance. The project will place priority on moving a family and/or individual who are literally homeless into permanent housing within 30 days. The project will assist participants to locate, obtain and retain suitable housing. The assistance will be tenant based and can be provided as short term rental assistance (3 months) or medium term (4-24 months). Case management will be provided to assess, arrange and coordinate the delivery of an individualized service plan to meet the needs of the program participant to ensure self-sufficiency. Case managers will provide linkage to employment and education services to build up the income support base necessary for the household to maintain housing stability. Agency case managers offer participants credit counseling and repair through a partnership with DuPage Homeownership Center. Additionally, the agency offers comprehensive employment services at their Employment/Career Solution Center. This includes individual assessments, employment readiness services, job seeking and job retention strategies, and a computer lab for job searches. The project partners with WorkNet DuPage to provide vocational training for manufacturing, CDL, CNA, and computer technology as well as Sedexo for internship programs in food service. Through the provision of temporary rental assistance and support services participants will gain the skills necessary to maintain housing and function independently in the community.
Performance Measure Thresholds: 1. Project Type	**Permanent Supportive Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project is permanent supportive housing which will provide 11 scattered site housing units for chronically homeless single households. The project will prioritize candidates in accordance with Notice CPD-14-012 through the CoC Coordinated Entry process. The tool that will be used to make this determination will be the CoC standardized assessment tool which is the Vulnerability Index-Service Prioritization and Decision Assistance Tool (VI-SPDAT). Pathways uses housing first and harm reduction approaches and offers intensive case management to tenants, including twenty-four-hour crisis assistance. The goals of the project are to assist chronically homeless persons to obtain and remain in housing; to improve self-sufficiency with the ability to live independently in an apartment in regards to housekeeping, cooking, grocery shopping, and personal hygiene; to obtain eligible mainstream benefits and/or obtain earned income; and to learn how to structure their day and develop pro-social activities. The project partners with WorkNet DuPage to provide vocational training for manufacturing, CDL, CNA, and computer technology as well as Sedexo for internship programs in food service. The agency has established community partnerships with medical providers that assure access to needed healthcare and support services for people experiencing chronic homelessness. Services to our clients include: HAS for substance abuse services; DuPage County Health Dept. for outpatient primary health services and mental and behavioral health services; Visiting Nurse Association (federal Qualified Health Center) for outpatient primary health services. Tenants are individually assessed to link with needed services.
Performance Measure Thresholds: 1. Project Type	**Permanent Supportive Housing**
Please provide a brief description of your project. Include information about the type of assistance and housing you plan on providing or have been providing, your project's accomplishments, and planned goals for next program year.	The project provides housing and support services to 4 chronically homeless single veterans in 4 scattered site one bedroom apartments in DuPage County. This project targets veterans with the highest needs and greatest barriers to obtaining and maintaining housing. The project uses a Housing First, Low Demand model of service with a Harm Reduction component. We do not require sobriety or participation in support service activities. We actively engage participants, meeting them were they are at, encouraging positive behaviors, but do not require participation in services as a condition for housing. The agency does provide Case Management and support services designed to help participants successfully maintain housing. However, housing is not contingent on compliance with services, but rather compliance with a standard lease agreement. It is our belief that once housing stability is attained, participants will take advantage of various other support services made available to them, if desired, to help increase their level of independence and life skills. Case Management services offer comprehensive assessment of client needs and the development of a mutually agreed upon strengths based plans focused on maximizing financial resources via employment as well as connection to mainstream and veteran specific benefits. Employment services offer comprehensive job-readiness assessment, tailor made action plans to address barriers to employment, as well as job search and job retention assistance. The project uses the CoC Coordinated Entry process as a means for prioritizing those homeless veterans most in need. Last year's accomplishments included: Bed utilization rate was 100%. Of the 4 Veterans enrolled 75% (3 of 4) have retained their level of income compared to income at entry and 25% (1 of 4) increased their level of income compared to their income at entry. 75% (3 of 4) Veterans are activity working on sobriety. 75% (3 of 4) Veterans have reconnected with family members since enrollment. 50% (2 of 4) Veterans established savings accounts. One Veteran has saved $300 and the other has saved $500. 100% (4 of 4) Veterans achieved and maintaining housing stability for the first time in a very long time. Future goals include: maintaining housing stability for participants enrolled or exiting them to other permanent housing, maintaining bed utilization rates at or above 90%, and increasing household income through employment, as well as cash and non-cash benefits
Performance Measure Thresholds: 1. Utilization rate below 90% ; Unspent HUD funds; Less than 80% exiting to permanent housing; Less than 50% of participants meet employment or total income measures; Agency had significant managerial changes or lost key personnel; Other significant program changes.
